DESCRIPTION OF THE FINDING LIST

This listing gives the places and physical description of all the papers of Felix Kaufmann, except for his bound notebooks. The Handbook has been numbered, listed, and classified in the order in which it was found. Most of the letters, scraps, notes, and critical commentaries were found arranged thus:

FINDING LIST

for the Papers of

FELIX KAUFMANN

... which were already taken out of the general correspondence and placed in the Handbook. The letters, etc., which were already taken out of the general correspondence and placed in the Handbook are to be found in the Handbook. The finding list (Volume II, Section 1, Section 1, 1-1) contains the balance of the correspondence arranged by name. This list lists the addresses, journal articles, clippings, etc. which were not arranged by topic. These were not classified, but were listed in the order found.

The table of contents of this list provides two page numbers for each folder of the Handbook: the page number at which the folder is listed, and the page number of the first page of the findings which is in that folder. The correspondence in Section II was listed in the Handbook of contents by the letters of the alphabet, rather than by name.

All information in the finding list which appears in square brackets is an interpolation. The dates given for the papers are approximate.

DESCRIPTION OF THE FINDING LIST

This listing gives the placing and physical description of all the papers of Felix Kaufmann, except for his bound notebooks. The Nachlass has been numbered, listed, and microfilmed in the order in which it was found. Many of the letters, essays, notes, and critical commentaries were found arranged into folders according to topic. In some cases I have provided titles for the folders. The letters, etc. which were already taken out of the general correspondence and arranged by subject matter are to be found in Section I of the finding list (volume I). Section II (volume II, A-K; volume III, L-Z) contains the balance of the correspondence arranged by name. Section III lists the off-prints, journal articles, clippings, etc. which were not arranged by topic. These were not microfilmed, but were listed in the order found.

The table of contents of this list provides two page numbers for each folder of the Nachlass; the page number at which the folder is listed, and the page number of the first page of the Nachlass which is in that folder. The correspondence in Section II has been listed in the table of contents by the letters of the alphabet, rather than by name.

All information in the finding list which appears in square brackets is my interpolation. The sizes given for the pages are approximate.

The following abbreviations were used:

cc : carbon copy
E : English
F.K. : Felix Kaufmann
G : German
H : handwritten
Mrs. K. : Mrs. Kaufmann (Dr. Else Kaufmann)
P : page
pc : post card
PPR : Philosophy and Phenomenological Research
T : typewritten

Journal issues, newspapers, clippings, etc. are numbered, one number for each item, to indicate their position in the Nachlass. These items were not microfilmed. The offprints, etc. listed in Section III were not numbered.
