To adjust the screen resolution in different Windows versions

Windows XP:
Desktop => rightclick => properties => Tab „Settings“ => Adjust the resolution to 1024x768

Windows Vista:
Desktop => rightclick => adjust/customize => Adjust the resolution to 1024x768

Windows 7/8:
Desktop => rightclick => Screen resolution => Adjust the resolution to 1024x768

To adjust the screen resolution in Apple MacOS X

If „show monitors in menu bar“ activated you can adjust the resolution and the sync behavior directly over the menu bar.

To adjust the screen resolution in MacOS X you have to follow the following steps:
Applemenu (top left) => Systemsettings => Monitors
Afterwards go to the tab „Monitor“ and choose 1024x768 / 75 Hz.
Please activate „Sync Monitors“ in the tab „Arrange“.
By use of the Button „collect windows“ the two windows will be collected for the different displays in the main window.
