To adjust the screen resolution in different Windows versions

Windows XP:
Desktop => rightclick => properties => Tab „Settings" => Adjust the resolution to __1024x768__

Windows Vista:
Desktop => rightclick => adjust/customize => Adjust the resolution to __1024x768__
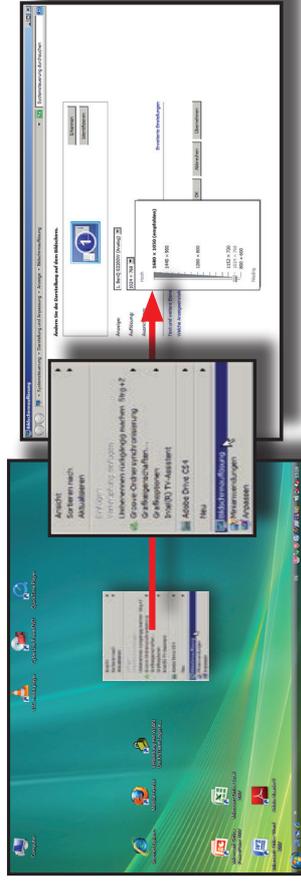

Windows 7/8:
Desktop => rightclick => Screen resolution => Adjust the resolution to __1024x768__

To adjust the screen resolution in Apple MacOS X
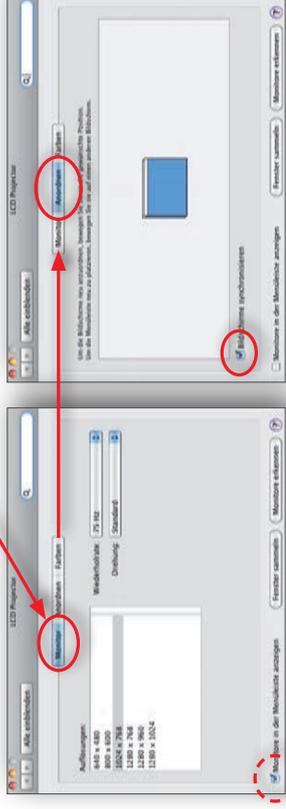

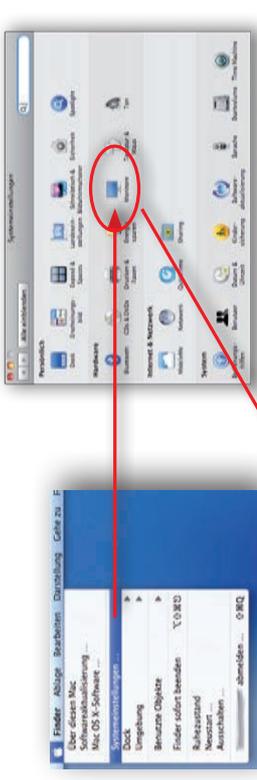

To adjust the screen resolution in MaxOS X you have to follow the following steps:
Applemenu (top left) => Systemsettings => Monitors
Afterwards go to the tab „Monitor" and chose __1024x768 / 75 Hz__.
Please activate „SyncMonitors" in the tab „arrange".
By use of the Button „collect windows" the two windows will be collected for the different displays in the main window.

If „show monitors in menu bar" activated you can adjust the resolution and the sync behaiour directly over the menu bar.
